Android Development

Jose Alfred Magat

Software Engineer
Pagbilao, Calabarzon, Philippines

Summary

I am a versatile software developer with a strong foundation in mobile, web, and desktop application development. My expertise spans across Android development using Kotlin, web development with Python or JavaScript, and desktop/console applications using C#, Java, or Visual Basic. In addition, I have experience in layouting and graphics design, which enhances my ability to create user-friendly and visually appealing applications.

I've had the opportunity to contribute to meaningful projects, such as developing Windows Forms applications for the Philippine Fisheries Development Authority (PFDA) - Lucena Fish Port Complex. Additionally, I created an Android app as part of my capstone project, further showcasing my skills in mobile development.

I'm always eager to take on new challenges and expand my skill set across various platforms and technologies.

Experience

Autron
Software Engineer
July 2024 - Present (9 months)
